this book sets out to describe the multi dimensional nature and function of rhetorical questions in the old testament biblical scholars have previously analyzed the use of rhetorical questions in both testaments but consistently describe their function in persuasive terms while this understanding is appropriate in a number of instances many rhetorical questions do not operate this way and jim w adams focuses in particular on rhetoric expressing the self involvement of both the speaker and hearer among linguistic philosophers speech act theory has illuminated the fact that uttering a sentence does not merely convey information it may also involve the performing of an action the concept of communicative action provides additional tools to the exegetical process as it points the interpreter beyond the assumption that the use of language is merely for descriptive purposes language can also have performative and self involving dimensions in relation to speech act theory linguistic specialists continue to research the nature of rhetorical questions

the third of three volumes of james barr s collected essays this volumes includes barr s extensive papers on linguistic matters relating to biblical hebrew and greek and on biblical translation in the ancient and the modern world
